Shut the Box X 4

Pick the game board for the times table you are practising (you don't have to do the same as your partner). Roll 2 dice and find the sum of the 2 numbers. Now multiply this by the times table you are practising. Put a cross on the answer. If your answer is already crossed off, you miss a turn. The first person to cross off all their answers is the winner. (There is NO box for 2 x 4; there are two boxes for 4 x 6 and 4 x 7.)

48	40	24
28	24	20
36	12	44
32	28	16
