

Maths in Year 2

Children in Year 2 use their fluent understanding of numbers to 10 and apply this knowledge to help them add and subtract numbers within 100. They explore place value and all the different ways a 2 digit number can be partitioned.

In Year 2 the children's mathematical knowledge is applied in different contexts including practical measure lessons exploring, weight, length and capacity

Children secure their understanding of the 4 operations: addition, subtraction, multiplication and division. They learn multiplication as 'groups of' and the sharing and grouping models of division.
